

PRESS RELEASE (January 20, 2022)

### **A Little Help From Our Friends :)**

GlobalRise has a Vision but we can't do it without friends!

On that note we are truly excited to announce a new relationship with HIMSS Institute, an organization advancing social impact to help non-profit members change our world for the better!

HIMSS, a global advisor on health tech and the world's largest convener of health information and technology executives, is now positioned as an anchor for GlobalRise!

With HIMSS Institute, GlobalRise is moving forward with plans to build three Digital Food System prototypes in Africa, India and Guatemala. Digital Food Systems are multi-thematic community platforms that use technology and evidence-based practices to pivot communities away from disease and poverty...eliminating stunting and other forms of malnutrition.

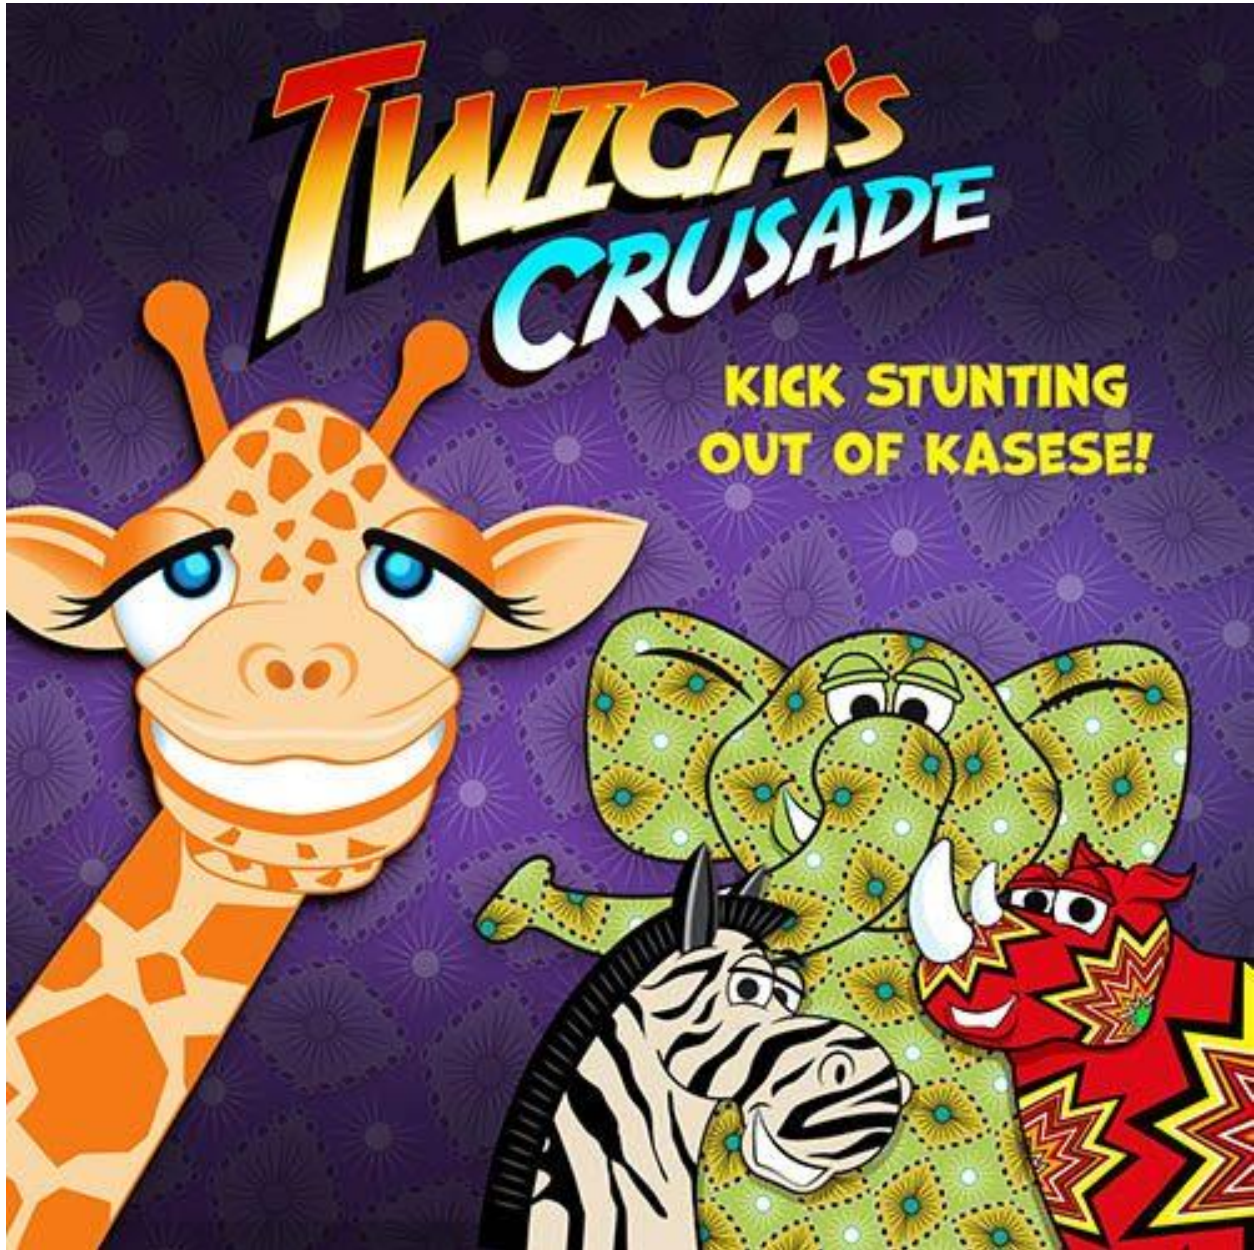

Scaling Digital Food Systems with local governments provides a needed demonstration platform that will allow us to repeat it all over again in many extremely poor regions where 300 million people are food insecure and truly forgotten by the world.

We invite you to join [Twiga & Friends to Kick Stunting Out of Kasese!](#)

Come along with us on a global journey through mountain jungles, deserts and fast moving rivers where children are stunted and desperately need your help.

Together we can build A World of Healthy Kids!

*John Casillas from GlobalRise will Keynote the Global Health Equity Symposium at HIMSS22. [Click here for more details.](#)*
